STATEMENT OF INSPECTION FOR TRUENESS TO NAME

Amherst, Mass. October 29, 1940

TO WHOM IT MAY CONCERN:

This is to state that all the saleable apple and pear trees now growing in the Wallingford Nurseries, near Wallingford, Connecticut, have been examined by me and, as they now stand in the nursery row all trees are, to the best of my knowledge and belief, true to name.

> J. K. Shaw, Research Professor of Pomology

NON-WARRANTY

We strive to avoid mistakes, but in the event that any nursery stock sold by us should prove untrue to the label under which it is sold, provided notice and proper proof are furnished to the seller, the seller shall, at the option of the buyer, either refill that portion of the order which was mislabeled, by another delivery of stock or refund the purchase price. But in any case the seller is not to be held responsible for a sum greater than the original selling price of such stock. All sales or agreements to sell are made which to shorter of pursery stock from fire frosts drought or other causes subject to shortage of nursery stock from fire, frosts, drought, or other causes beyond control of the sellers.

APPLICATION OF PRICES

Customers may select 5 of any kind (such as 5 peach) at the 10 rate, 50

DISCOUNT

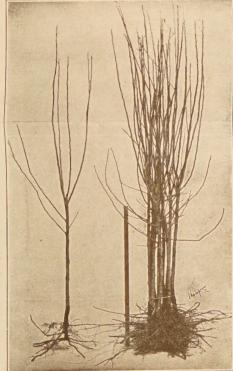

5% discount may be deducted on all orders where the total amount is remitted with the order and this is sent before April 1st.

SIZE OF TREES

Caliper or diameter governs the size of all fruit trees except 1-year

STANDARD APPLE TREES ORDER EARLY

Permanent apple trees are usually planted about 40 feet apart. Some growers prefer more, some a little less. Some also use fillers, such as peach growers preter more, some a little less. Some also use fillers, such as peach trees, or early bearing varieties of apples, making them 20 feet apart, or if planted only in the center of the 40-foot space the distance will be 28 feet. As the trees begin to crowd, taking out one-half will leave them 28 feet apart and later when the remaining fillers are removed, the distance will be 40 feet. Thus an income can be had for many years, when the permanent trees will need only a portion of the land. trees will need only a portion of the land.

Two years old 11 in. and up Apple Trees

THE NORTH EAST

Fruit growing in the North Eastern United States has developed into one of our major agricultural industries, and well it should. There are natural advantages to this great section which should not be overlooked.

Its proximity to great consuming centers is its best asset. The cost of transportation from the west is more than the cost of producing the fruit, and worse yet, so many times it must be sold on commission in which case the grower has nothing to say as to what it brings. When the grower can load his production onto his own trucks and deliver it to the buyer, or better yet have the buyer come to the grower's door with his truck and pay cash, the results are the best net price which can be obtained in the whole United States.

However, to attract the best and largest buyers there must be sufficient production to make it worth while for these buyers to come to the producers door. In other words, apple growing has developed into a real business, not just a side line. If production is not sufficient to use the best labor saving machinery and not sufficient to attract large buyers, the answer might well be "plant more trees" toward such an end.

We are selling only apple trees of our own growing and every tree offered by us has had Dr. Shaw's inspection for trueness to name.

Dear Sirs:

Milford, Mass

We want to thank you for the trees we received. They were all in perfect condition.

TRANSPLANTED APPLE TREES

For several years we have been transplanting two or three year old apple trees and growing them into larger sizes. This transplanting makes the trees just as safe to move as a properly grown shade tree.

PRICES

1½ in. cal. 8-10 ft. (in varieties marked °)	3.00		
2 in. cal. 9-10 ft. (in varieties marked /)	4.00		

/°†*Baldwin. Large red winter apple. Known by all.

Cortland. Very similar to McJesch in flavor. Larger, darker red, ripens two weeks later, hangs to tree tetter and well worth planting.

*†*Red Strain Delicious. A bright red strain, colors early and considered much superior to common Delicious.

†*Duchess. Striped red. Early August. Following Red Astrachan.

†*Early McIntosh. A cross between McIntosh and Yellow Transparent Fruit is very similar to McIntosh in appearance, ripening about two weeks after Yellow Transparent.

/°†Fall Pippin. Well known Fall variety. Transplanted trees only.

Gallia Beauty (Red Rome Beauty). Generally considered to be the best red strain of Rome Beauty. An early and annual bearer of late winter apples which retain a bright, shiny appearance until spring.

/° †*Gravenstein. Large, striped, red. August and September

/°†*Red Gravenstein. (Washington Strain) Originated in the state of Washington and is said to be the best red strain of Gravenstein. The fruit is similar to Gravenstein but a darker red and very little stripe.

†*Kendall. A handsomely colored dark red apple of McIntosh season.

°†**Lodi.** The fruit has the same color as Yellow Transparent, ripens at the same season, but will average two as large.

/°†*Macoun. A dark red variety very similar to McIntosh in appearance. The flesh is especially snappy and juicy and is one of the finest quality varieties grown. Follows Cortland. °†*McIntosh. Known by all. Season of picking middle of September. Our trees both 1 year and 2 year have been budded from especially selected red

type trees in our own orchards. *†*Melba. One of the newer varieties. Similar to Duchess in season and

markings, but better quality. /°†*Milton. Of McIntosh type, ripening two to three weeks before McIntosh. The fruits are covered with a pinkish red and is a most attractive variety. Flesh is white, tender, crisp, juicy and of McIntosh flavor and aroma.

†*Northern Spy. Well known early winter, red variety

/°†*Opalescent. Very large, red apple. Fall. Transplanted trees only.

*Red Astrachan. Best, early red apple. August 1st.

Red Rome Beauty. See Gallia Beauty.

/°†*Rome Beauty. A large, red striped, annual bearing, very late Winter

°†*Red Spy. A sport of Northern Spy. Similar in all respects to Northern Spy except in coloring in which it much surpasses its parent, having a solid red.

/°+*R. I. Greening. Fine dessert variety. Early winter.

/†*Roxbury Russet. Very late winter russet apple.

°†*Stayman Winesap. Standard winter apple in New Jersey. A good /°†*Wagener. Great filler variety. Bears young. Red, early winter.

†*Wealthy. Fine filler variety. Often bearing fruit in the nursery at two years of age. Red. Late August

°†*Yellow Delicious. Handsome, fine flavored yellow winter variety.

**Hyslop Crab. Very productive. Red.

PEACH TREES

SPRING DUG — FINEST TREES POSSIBLE

For several years peach trees have been lightly planted in the North Eastern United States. The hurricane of 1938 ruined fully one half of those Eastern United States. The hurricane of 1938 ruined fully one half of those in production. The result, less orchards, less production and higher prices. Varieties for good commercial orchards have changed very rapidly over a period of twenty years. The State of New Jersey in its peach breeding work has continually introduced new varieties far superior to those previously commonly grown. We have endeavored to keep abreast of the times and as new varieties of superior merit have appeared, we have discarded the old and taken the new. This year is no exception.

få in. cal. and up 5-7 ft. (extra large grade)
få-tå in. cal. 4-6 ft. (standard No. 1 grade)
få-få in. cal. 3½-5 ft.
få-få in. cal. 2½-4 ft.

TIME OF RIPENING IS FOR CONNECTICUT CONDITIONS

Mikado. (June Elberta) August 1st. A very handsome roundish variety. Yellow flesh-excellent quality.

Carman. August 15th. Medium to large. White. Very hardy variety.

Cumberland. August 15th. Practically free, white flesh, dark red coloring, elongated in shape, good size. Best white of its season.

Golden Globe. A very large, yellow round variety, usually free, ripening just ahead of Golden Jubilee. The flesh ripens rather slowly and the fruits hang to the tree for a long time, making it a favorable one to market both

Golden Jubilee. A block laden with rich golden yellow, red blushed fruit is a handsome sight. Similar to Elberta in general appearance, but a brighter golden yellow, slightly smaller size and much better flavor.

Vedetta. A beautiful, large, yellow peach of Canadian origin following immediately after Golden Jubilee.

Goldeneast. A very large, oval, highly colored, yellow fleshed peach, following Golden Jubilee and about two weeks before Elberta. Its unusually attractive appearance, high quality, large size and firmness stamp it as the finest introduction from New Jersey in several years. Our budding wood was purchased directly from New Jersey under the supervision of the New Jersey Experiment Station. We offer this variety this year for the first time at no additional price but only in connection with the purchase of other varieties.

Eclipse. August 25th. Medium size, yellow freestone, red cheek.

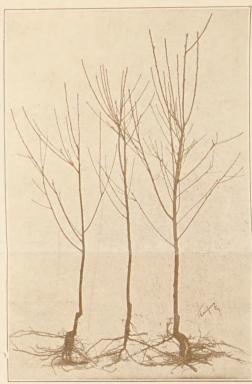

Hale Haven. This variety originated at the Michigan Experiment Station as a cross between South Haven and J. H. Hale. It is an improved South Haven, having large size, high color, excellent flavor and is very hardy. Don't fail to plant Hale Haven.

Belle of Georgia. September 1st. Probably the best known and most popular of white varieties

Elberta. September 4th. Known to all. King of Peaches.

J. H. Hale. September 8th. The tree is not a very strong grower, but the fruit of well grown J.H. Hale are immense, handsome and of excellent flavor.

Lizzie. September 20th. Best of its season. Similar to Elberta, being a chance seedling of that variety. Not quite as much red, but otherwis

Please write in the quantity, full name of variety, size or age and Any necessary correspondence should be written on a separate sheet.

We do not substitute varieties in cases where an item is sold out unless requested to so. If you wish a substitution, should we be unable to fill a portion of your order, write here.....in which case we will give you the nearest we can under its proper label. NON-WARRANTY

If any nursery stock proves untrue to the label under which it is sold, provided notice and proper proof are furnished by the buyer to the seller, the seller shall at the option of the purchaser, either refill that portion of the order which was mislabeled by another delivery of stock or refund the purchase price, but in any case the seller is not to be held responsible for a sum greater than the original selling price of such stock. All sales, or agreement to sell are made subject to shortage of nursery stock from fire, frost, floods, drought or other causes beyond control of the seller. Except for the aforesaid agreed liability, it is agreed that the seller, Barnes Nursery & Orchard Co. gives no warranty, either express or implied, as to description, productiveness, or any other matter of nursery stock it sells.

Quantity	Articles	Size or Age	Price

PEAR TREES

20 ft. apart is a very satisfactory planting distance.

Bartlett. September 1st. Large, yellow, standard canning variety.

Beurre Bosc. October. Very large, russet variety. Finest quality of any variety grown. The tree itself for the first few years is a poor grower, having a tendency to be quite crooked, but outgrows this with age.

Clapp's Favorite. August 15th. Large, bright red blush. Good quality.

Seckel. September 10th. Fine for pickling or table use.

CHERRY TREES

2 yr. 11 in. cal. 5-7 ft (except as noted) \$.90 \$8.50
Black Tartarian. Very dark. Delicious sweet variety.
English Morello. A very late, dark, sour cherry. 65c each.
Governor Wood. Very early, light with pink cheek. Very sweet.
Montmorency. The most commonly planted sour variety, 65c each.
Napoleon Bigarreau. A large white, sweet cherry with pink cheek, ripening last of June and early July.
Windsor. Large, late, dark red. Sweet.

PLUM TREES

2 yr. H in. cal and up 5-7 ft.	Each Ten \$.75 \$6.00
Abundance. Early August. Light with red cheek.	
Burbank. Middle of August. Deep red with yellowish ba	ackground.
Extra fine. German Prune, September A good purple preserving variety	

Italian Prune. One of the largest of prune varieties. Satsuma. A red fleshed variety. Excellent for preserving.

White Dorothy Perkins. White.

HYBRID PERPETUALS (HARDY)

\$.45 each \$4.00 per ten

American Beauty. Red. General Jacqueminot. Red.

Frau Karl Druschki. Pure white.

TEA ROSES (EVERBLOOMING)

\$.45 each

\$4.00 per ten

Betty Uprichard. Brilliant copper red buds and semi-double salmon pink flowers stained with copper pink on outside.

Columbia. Vivid pink.

E. G. Hill. Large blossoms of deep maroon, velvety inside, glistening outside.

Etoile de Hollande. Dark, velvety crimson.

Francis Scott Key. Brilliant crimson.

Gruss an Teplitz. Very free bloomer. Bright crimson red.

K. A. Victoria. Pure white. Very fine form.

Killarney White. Pure white.

Miss Rowena Thom. Brilliant, satiny pink, shaded with orange.

Mme. Butterfly. Bright pink, apricot and gold.

Mme. Edouard Herriot. Coral red, shaded yellow and scarlet. Mrs. Aaron Ward. Yellow, sometimes shaded salmon and rose.

Mrs. Charles Bell. Salmon, turning to pearly pink.

Mrs. E. P. Thom. Fine long buds open into rich lemon-yellow bloom. Pink Radiance. Carmine pink, yellow at base of petals.

President Herbert Hoover. Maroon, orange and gold, long pointed buds, rigid stems and continuous bloomer.

Red Radiance. Dazzling, crimson scarlet.

Talisman. Orange red, golden yellow and copper red.

Red Baby Rambler. A very free bloomer with blooms similar to crimson rambler, but plant dwarf.

EVERGREENS

We have a large assortment of varieties and sizes of evergreens, but as our past experience shows that buyers prefer to see this class of stock, we shall not attempt to list them, but in the spring we shall be glad to have our customers call and make their own selections.

TESTIMONIALS

Norwich, Conn., April 27, 1940 This week you shipped me a few shrubs which were received in very good condition and were very satisfactory. I thank you for your prompt attention.

Poughkeepsie, N. Y., May 8, 1940

Peach trees received in fine condition

I received my trees in excellent condition. They were good sturdy trees and had fine roots. I am very well satisfied.

I just received the 50 McIntosh trees and they were first class.

Springfield, Vermont

No. Billerica, Mass.

Very well satisfied with last year's Cortland whips.

Goods came 24th. Look very good.

Moore's Corner, Mass., April 26, 1940
